### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

1. The application has been amended as follows:

In claim 65, line 15, the word "corresponds" should be replaced with --correspond--.  
(end of amendment)

### ***Reasons for Allowance***

2. Claims 45, 51-54 and 65 are allowed.

It is noted that the closest prior art of record, Hutchins et al. (US Patent 5,208,897), teaches a method for speech recognition based on subsyllable spellings where a digital representation of speech is mapped into a set of ASCII characters, and the set of ASCII characters is grouped into words, but Hutchins does not teach a syllable matching process where if the number of syllables determined does not correspond to the at least one recognized word, then grouping the digital representation of the speech binary bit stream into subsets, mapping each subset into a character representation, generating a stream of character representations, and parsing the stream of character representations to group the character representations of speech into words.

Art Unit: 2654

Thus, independent claims 45 and 65 are allowable over the prior art of record because the cited prior art alone or in combination, does not fairly suggest or disclose the claimed combination of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
